

**Streamstar® SW 3.0 - New features overview**

**ADVANCED REPLAY FEATURES**

Streamstar® Replay system - the most powerful, efficient and easiest to use Replay & Slomo system in its class, now offers many new and advanced, features, that enable users to easily produce professional, broadcast quality, network television style productions. The Replay and Slomo system is included throughout the entire Streamstar® products range and upgrades are available FREE for all existing Streamstar® customers!

**DYNAMIC REPLAY**  
**DYNAMIC REPLAY CAMERA SWITCHING**

Enables switching of individual camera angles during replay playback. Same as when switching live cameras, but within a replay and in slow motion.

**SEQUENTIAL REPLAY**  
**SEQUENTIAL REPLAY PLAYBACK**

Enables playback of multiple replays in sequence. During a replay playback tap any replay camera you wish to play in sequence .

**REPLAY PLAYLISTS**  
**REPLAY PLAYLISTS**

Individual camera replays can be added to playlists to instantly create blocks of highlights or best scenes ready to be fired up at any time.

**REPLAY FAVORITES**  
**INDIVIDUAL REPLAY CAMERA FAVORITES**

Individual camera replays can be marked as favorites, which greatly improves the user's orientation in large numbers of replays.

**REPLAY NOTES**  
**REPLAY NAMING AND NOTES**

Each replay set can be named and info notes about the content can be added for faster identification and easier orientation in the replay set list.

**REPLAY PREVIEW**  
**LARGE REPLAY PREVIEWS**

Replay previews were significantly enlarged for better visual control and greater operational comfort.

## Streamstar® SW 3.0 - New features overview

**GRAPHICS**  
4 GRAPHICS  
LAYERS / DSK

**LAYERS**

4 channels of DSK with transparency are available to support the many graphics capabilities of the system. Previously called “Inserts” they are now renamed to “LAYERS”.

**CHARACTER**  
CHARACTER  
GENERATOR

**GENERATOR**

Lower thirds, subtitles, crawls and any kind of text objects are easily created with the internal character generator. Professional graphic templates are provided for speed and ease of use.

**MPEG-TS**  
MPEG-TS  
STREAMING

**STREAM**

Simultaneously send MPEG-TS streams with RTMP and SDI-OUT. This feature is greatly expanding the range of production capabilities and applications of the system.

**REMOTE**  
JVC CAMCORDERS  
IP REMOTE CONTROL  
AND REMOTE PRODUCTION

**CONTROL**

Close collaboration of JVC and Streamstar® resulted in a full integration of JVC camcorders functionality in Streamstar® Live production software, featured in every Streamstar® product.

Up to 6 JVC camcorders can be remotely controlled over IP, directly from the Streamstar® SW user interface. Their IP video stream output can be used in Streamstar® live production systems.

Streamstar® was the first to introduce IP remote workflows in their products years ago and continues to lead the IP revolution in live production.

**The future of live production - today.  
Brought to you by Streamstar®.**

**SCOREPLUS**  
SCOREPLUS  
PROFESSIONAL SPORTS GRAPHICS  
WITH IP WORKFLOW

**IP INPUT**

Streamstar® SCOREPLUS 2.0 is a newly developed application, capable of generating sophisticated, network TV style, sports graphics. Its ground breaking technology design, enables the output to be sent over IP, to a remote Streamstar® live production system, opening up a whole new range of remote live production possibilities. The typically Streamstar® style intuitive, easy-to-use GUI, ready to use graphic templates for a wide range of popular sports, highest quality output and a very affordable price make Streamstar® SCOREPLUS the best choice in sports graphics solutions available.

**Broadcast quality, professional sports graphics  
accessible and affordable.**
